Cemetery Records

Datalogic Cemetery Records is intended to replace manual lot and burial record keeping with an automated system. The system was custom designed for a municipality with approximately 20,000 graves.

Program Features

- Unlimited number of lots and graves
- Supports any number of graves per lot
- Invoices for funeral homes and individuals
- Includes versatile Report Query program for user-defined reports
- Compatible with Crystal Reports (optional)
- Program customization and additional report design available
- Software is written utilizing the extremely powerful language, *Visual Dataflex*, a Windows compliant database management system
- Multi-user

Sample Screens

- **Lots** - Tabs for Address, Ledger, Burial, and Notes
- **Burials** - Tabs for Cemetery, Ledger, and Notes
- **Reports** - Several sample reports and sample user-defined Query

For a cost estimate, please contact sales@datalogicsys.com.

Lot Notes

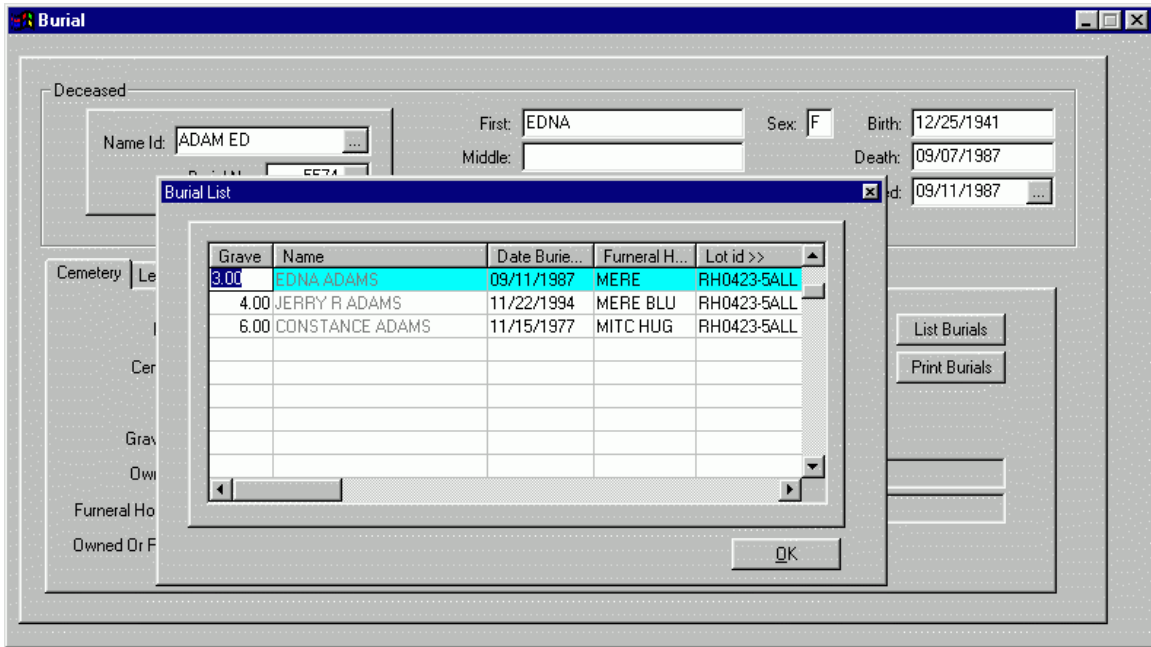

Lot Selection List

Pressing the **Prompt Key** displays a list of lot records that can be used to locate the desired data record. Mouse click in a different column and the list re-sorts.

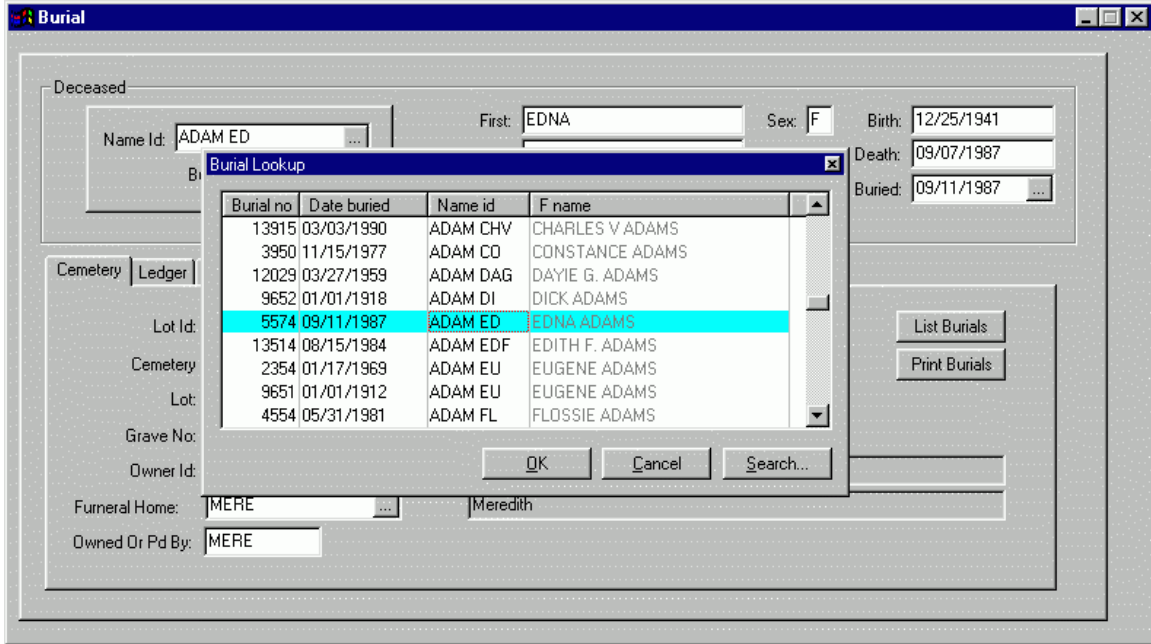

Burial Notes

List Burials

Press the button, **List Burials**, to display the names of persons buried in the lot.

Press the button, **Print Burials**, to print the names of persons buried in the lot.

Burial Selection List

Pressing the **Prompt Key** displays a list of burial records that can be used to locate the desired data record. Mouse click in a different column and the list re-sorts.

Reports

The Cemetery Records database includes information on the lot sales and burials. Information in the database can be extracted in a number of ways to provide reports, invoices, statements, etc. Several report methods are available, including:

- **Query** - VDFQuery is included to enable users to design many additional reports. VDFQuery is an easy to use report generator that enables users to quickly obtain various types of reports. Report formats can be saved for future use.
- **Crystal Reports** - The data in Cemetery Records can also be extracted utilizing Crystal Reports, one of the most flexible and comprehensive report generation programs available. Reports written in Crystal can be designed by *Datalogic* or designed by the user. User designed reports require the purchase of Crystal Reports.
- **Pre-designed Reports** - Several reports have been designed at the request of our customer. Several of these are presented as examples. *Datalogic* can provide additional reports as required.

The following pages include examples of several reports.
