NANO UFR CONNECTION WITH RGB MODULES

Nano uFR reader can be connected with RGB modules.

For that purpose, are used 3 pins on the board.

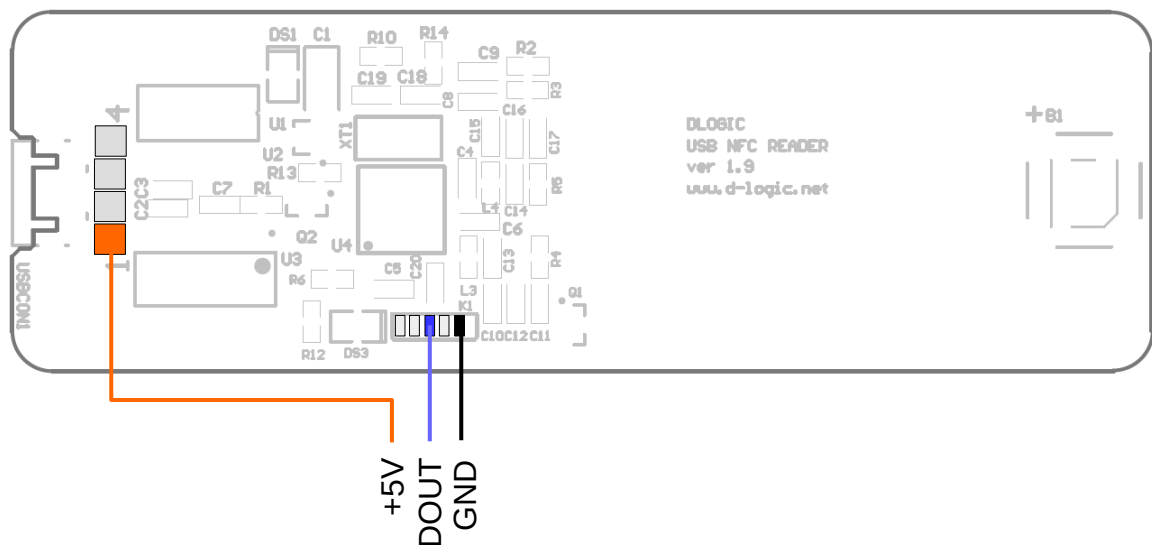

They are:

+5V

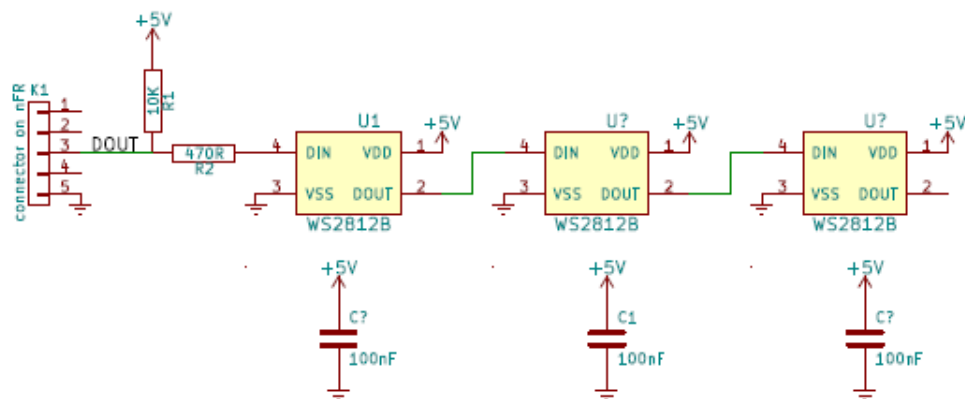

DOUT

GND

Position of pins is shown in the following figure

Schematic is shown in the following figure

Example with 3 WS2812B RGB modules.
Instead of WS2812B may be used APA104 or SK6812 RGB modules.
